The engine is an interference design. More than likely the engine is toast & will need to be replaced. That's why changing the timing belt at 60k is so

### Accent Timing Belt | Hyundai Forums

Probably an EVAP problem..emissions system system. When you fill up, the gas going in displaces air and gas fumes and those fumes (are supposed to) go in to a vent from the tank to a charcoal filled canister that soaks up the fumes, instead of coming out in your face and in to the air we all breathe.

A dual-clutch transmission (DCT) (sometimes referred to as a twin-clutch transmission or double-clutch transmission) is an automated automotive transmission, closely related to a manual transmission. It uses two separate clutches for odd and even gear sets. It can fundamentally be described as two separate manual transmissions with their respective clutches contained within one housing, and ...

The second strategy of reducing petroleum consumption is to shift use of petroleum to other energy sources. Various alternative energy sources and corresponding powertrains are summarized at two sides of Fig. 2, according to energy sources, on-board energy and propulsion systems. Primary solutions include flexible-fuel vehicle (FFV) and electrified vehicles.
