Logic In Computer Science Solution

In logic and computer science, unification is an algorithmic process of solving equations between symbolic expressions.. Depending on which expressions (also called terms) are allowed to occur in an equation set (also called unification problem), and which expressions are considered equal, several frameworks of unification are distinguished.If higher-order variables, that is, variables ...

Intuition and Logic. Intuition and Logic are two strategies for prediction and problem solving. We hear so much about the virtues of logic that we'd be excused to believe that logic was somehow the superior method, but a quick analysis shows that most actions we perform on a daily basis mainly use intuition.

Intuition versus Logic

In this paper, we address the problem of generating person images conditioned on both pose and appearance information. Specifically, given an image x_a of a person and a target pose $P(x_b)$, extracted from a different image x_b , we synthesize a new image of that person in pose $P(x_b)$, while preserving the visual details in x_a .
