A flat engine is an internal combustion engine with horizontally-opposed cylinders. Typically, the layout has cylinders arranged in two banks on either side of a single crankshaft and is otherwise known as the boxer, or horizontally-opposed engine. The concept was patented in 1896 by engineer Karl Benz, who called it the "contra engine.". A boxer engine should not be confused with the opposed ...

Today's pump gasolines contain additives which will degrade older rubber hoses, sometimes in as little as one year. Even brand new low pressure fuel hose (non-fuel injection) isn't guaranteed to protect against this degradation. Our hose meets 30R14 standards for high pressure fuel injection use and is resistant to corrosive fuel additives. It's an excellent choice for carb applications as well.
