### **Why Won't My Maytag Top Load Washer Fill With Water ...**

GE washing machine fills with water but will not agitate or spin. It does not sound like the timer is advancing. - Answered by a verified Appliance Technician

### **GE washing machine fills with water but will not agitate ...**

Get shopping advice from experts, friends and the community! After it fills with water it does not agitate, spin, or drain the water. I've tried putting it on different settings but have the same outcome- nothing happens after it fills with water. It does not make any weird noises, it's quiet after it fills with water. The dial does not automatically move to rinse or spin.

### **Whirlpool Washer fills with water, then does nothing ...**

On newer washers, it takes about 20-30 seconds for the machine to sense the load and engage the drive system after the water has stopped filling. Make sure the washer lid is down. The washer will not agitate or spin with the lid up, though many models will still fill and drain and the timer will advance.

### **Top Load Washer Fills But Will Not Agitate**

If the washing machine is constantly filling with water but drum never over fills This is normally the waste hose is too low and the appliance is either syphoning the water out or just flowing out the waste. See picture below for correct fitting.
